Introduction to the Venue List

The Venue List is organized by year. For each year the Venue List sets out all the races and other motoring events from which we have photographs, with the number of black & white and color images also provided, along with our internal archive reference numbers.

For each year the first section includes events for which we know the exact date or dates, followed, monthly, by those for which we only have the month. The second section in each year sets out those events for which we only know that the event occurred during the year in question.

The following table gives our archive reference coding for our various photographers:

All 1936-39 photographs, other than those for which codes are listed in the table below, and all Reference Numbers using the year followed by "C" or "R" (eg. 52C or 52R) are by Louis Klemantaski.

All Reference Numbers beginning with a "C" indicate color. Generally, the first two digits of each listing indicate the year.

Other letters following the year indicate the photographer as follows:
